PROFESSIONAL SUMMARY

GIS Solutions Engineer with 4+ years in GIS technologies and the analysis behind them, including GIS web maps, spatial analysis, GeoAI, remote sensing, and LiDAR, with a focus on Esri products. Top Rated on Upwork with a 100% Job Success Score.

WORK EXPERIENCE

Senior GIS Developer **Sep 2026 - Present**
Gulf Terminal, Mansoura, Egypt

- Lead GIS software design and development with the Esri suite and standard programming tools.
- Own and extend the ArcGIS Maps SDK API library for 2D and 3D web apps and spatial analysis.
- Write programming specifications and review results with project managers.
- Work with SQL Server and PostgreSQL, and debug production issues as they appear.

GIS Developer **May 2023 - Sep 2026**
Gulf Terminal, Mansoura, Egypt

- Built a dynamic API library on the ArcGIS Maps SDK for JavaScript for 2D and 3D GIS web apps and spatial analysis.
- Design, develop, and maintain software with the Esri suite and standard programming tools.
- Write programming specifications for assigned tasks.
- Work with SQL Server and PostgreSQL.
- Test systems and review results with project managers.
- Write source code, run validation tests, and debug issues as they appear.

Sr. GIS Solutions Engineer | Top-Rated Freelancer **2024 - Present**
Upwork, Remote (CA)

Maps don’t have limits. A good map tells an excellent story.

With over 4 years in GIS, I turn complex geospatial data into accurate, practical solutions for analysis, visualization, automation, and decision-making.

I help businesses, researchers, and organizations understand their spatial data, solve location-based problems, and get clear, actionable results. The work covers GIS development and interactive web apps, spatial analysis, GeoAI, remote sensing, LiDAR, and spatial data automation. I pick the stack from the problem, the workflow, and the outcome you need.

- Turn complex spatial data into clear insights and decision-ready outputs.
- Build GIS workflows that cut manual work and keep results consistent.
- Analyze locations, property, terrain, and spatial relationships to support planning.
- Create interactive maps and GIS applications that make spatial information easier to explore.
- Typical work: property and site analysis, location intelligence, terrain and elevation, remote sensing, spatial visualization, and GIS web apps.
- I start from what the data or application needs to accomplish, then choose the analysis, tools, and workflow that fit.

GIS & AI Developer (Contract - Part-time · Remote) **Jan 2024 - Dec 2024**
Applied Innovation Center (AIC), MCIT, Smart Village, Giza, Egypt

- Team leader for about one year in 2024 on a large Google Earth Pro project, annotating study areas of about 1 km.
- Drew polygons around specific objects, green land, agriculture, desert crops, and urban areas, then labeled them for crop and land-use classification.
- Reviewed the team’s results and prepared reports for the supervisor.
- Critical assignment with the Ministry of Communications and Information Technology, adding national-scale government geospatial work to this experience.
- Supported AIC agriculture decision-support work: classifying land use and labeling strategic crops so maps could inform planning, subsidies, and food security.
- Supported satellite-based mapping and urban classification: tracking change across industrial zones, new cities, informal settlements, and agricultural land.

GIS Developer **Jun 2022 - Feb 2023**

Edge Pro for Information Systems, Cairo, Egypt

- Built customized client solutions and GIS demos.
- Worked with ArcGIS API for JavaScript, Esri technologies, JavaScript, Python, and SQL.
- Contributed to a GIS and remote-sensing project presented at COP27, Sharm El-Sheikh, 2022.
- Worked with ArcSDE, RDBMS, ArcGIS Server, SQL Server, and PostgreSQL.
- Used Hexagon technologies and ERDAS Imagine.
- Coordinated with external stakeholders.
- Collaborated with developers and architects.

GIS Specialist **Apr 2022 - Jun 2022**

Edge Pro for Information Systems, Cairo, Egypt

- Worked on GIS integration for military surveying and military-space workflows.
- Produced geographic reports and data visualizations.
- Built mapping tools and applications.
- Applied GIS fundamentals: data formats, projections, editing, and georeferencing.
- Reviewed GIS data for accuracy and standardized geographic datasets.
- Worked with geospatial databases.

EDUCATION

Professional Diploma in GIS & Web Development **2022**

Information Technology Institute (ITI), Smart Village, Egypt

- **Graduation Project:** "Business Solutions Web App" (co-authored with team) - Created a spatial data analysis application using ArcGIS Enterprise and Web Development tools for business insights.

B.Sc. in Geomatics, Surveying & Remote Sensing (1st Class Honors) **2017 - 2021**

Mansoura University, Egypt

- **Graduation Project:** "Simulation Model of the Faculty of Arts" using ArcGIS Pro - *Grade:* Excellent.

Professional Certificate in Front-End Web Development **2023**

National Telecommunication Institute (NTI), Digital Egypt Youth Program

- **Key skills gained:** Bootstrap, jQuery, and JavaScript.

Esri Saudi Arabia User Conference, 23 January 2024.

SKILLS

GIS platforms and servers	ArcGIS Pro · ArcGIS Enterprise (Server, Portal, Online) · QGIS · GeoServer · M.App Enterprise · Google Earth Studio
Web mapping	ArcGIS Maps SDK for JavaScript · Leaflet · Mapbox · OpenLayers
Spatial databases	PostgreSQL/PostGIS · SQL Server · SQL
Programming and tools	Python · JavaScript · HTML/CSS · Git/GitHub
Remote sensing	ERDAS Imagine · ENVI · LiDAR processing · Hexagon technologies

LANGUAGES

Arabic	Native
English	Professional working proficiency

PERSONAL INFORMATION

Birthdate	April 1, 1999
Military status	Exempted
Address	Mansoura, Ad Dakahlia, Egypt

Thank you for your time. I would love to hear from you if you are at all further interested in my work.
